Industry Update December 8, 2020

Climate Change Strategy

The State of Nevada has released its Climate Change Strategy. You can access the entire report [HERE](#).

You can view the list and links of specific proposals [HERE](#). The commercial real estate industry will be interested in the benchmarking and energy audit provisions, and especially, the suggestion that new projects be developed WITHOUT natural gas hookups, or fully electric.

We will be following this closely over the next weeks and months as the state legislature, state agencies, and local governments work their way through this document and move toward implementation.

Reno-Tahoe International Airport Survey on Business and Leisure Travel

The Reno-Tahoe International Airport is seeking input on how to best serve you during and after the pandemic. They would like to understand your current and future interest in business and leisure air travel, how the pandemic has influenced your feelings about air travel, when you'll feel comfortable getting on a plane again, and where you'd like to fly when the time is right.

The Air Traveler Sentiment Survey is [HERE](#) and will only take 5-10 minutes. The information collected will be blended together so individual information is protected. But if you are comfortable providing your contact information, you will be entered to win one of four \$250 Southwest Airlines gift cards.

Carson City Waives Business License Fees for 2021

The Carson City Board of Supervisors voted to waive business license renewal fees for 2021 to assist businesses during the coronavirus pandemic. They also postponed a rate increase for water, wastewater, and stormwater from January 1 to July 1. [HERE](#) is a meeting recap from the Nevada Appeal.

Nevada's Covid-19 Vaccination Program

The Nevada Department of Health and Human Services Division of Public and Behavioral Health has released their COVID-19 Vaccine Playbook [HERE](#). They anticipate that Nevada will receive more than 164,000 doses of the vaccine by the end of the year. They will utilize an existing vaccine distribution infrastructure established for Nevada and believe this is an equitable and science-based plan to administer the vaccine to every Nevadan who wants it. It will begin with Tier One individuals who are critical to ensuring the health and safety of Nevadans.
